

## 5V电压系统(低压保护) 5V Voltage System (Low-voltage protection)

### 产品概述

12.4mm超薄设计；  
电涌防护模块支持热插拔，拔出后不断线；  
电涌防护模块可单独检测，维护便捷；  
适用于热电偶、热电阻、CAN、RS485、RS422  
等带公共参考电位的信号回路；  
通过DIN35金属导轨接地。

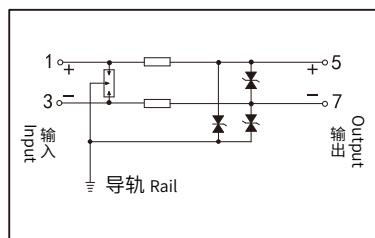

### Product overview

12.4mm ultra-thin design;  
Surge protection modules are hot pluggable, no  
disconnection after unplugging;  
Surge protective module can be individually  
detected, convenient to maintain;  
Suitable for TC, RTD, CAN, RS485, RS422 and other  
signal circuit with public reference potential ;  
Earthing through DIN35 metal rail.

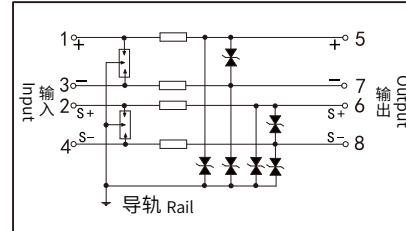

### 技术数据 Technical data

|   | 二线制 Two-wire                 | 三、四线制 Three-/ Four-wire      |
|---|------------------------------|------------------------------|
| 额定工作电压Un<br>Rated operating voltage Un  | 5V                           | 5V                           |
| 最大工作电压Uc<br>Maximum operating voltage Uc  | 6V                           | 6V                           |
| 标称工作电流IL<br>Nominal operating current IL  | 1A                           | 1A                           |
| 标称放电电流In(8/20μs)<br>Nominal discharge current In (8 / 20μs)                                 | 10kA                         | 10kA                         |
| 最大放电电流Imax(8/20μs)<br>The maximum discharge current (8 / 20μs)                              | 20kA                         | 20kA                         |
| 雷电冲击电流Iimp(10/350μs)<br>Lightning surge current limp (10 / 350μs)                           | 2.5kA                        | 2.5kA                        |
